

Data sources for mainstream QR funding

Our mainstream QR funding is allocated selectively according to quality.

The source data we have used to calculate mainstream QR funding for 2008-09, 2009-10, 2010-11 and 2011-12 are shown below.

Volume measure	Source of data for 2008-09	Source of data for 2009-10	Source of data for 2010-11	Source of data for 2011-12
Category A FTE staff submitted to the RAE and attributable to quality levels 2*, 3* and 4*		2008 Research Assessment Exercise	2008 Research Assessment Exercise	2008 Research Assessment Exercise
Category A (and A* staff in post on the RAE census date) FTE funded from general funds and NHS funds	2001 RAE			
Research fellows	2007 Research Activity Survey			
Research assistants	2007 Research Activity Survey			

In the QR funding Excel file the column headed 'Quality-weighted volume' contains the volume measure multiplied by the quality weighting. For 2011-12, the following quality weightings were applied to the 2008 Research Assessment Exercise quality profiles:

Quality level	4*	3*	2*	1*	Unclassified
Quality weighting	9	3	0.294	0	0

Data sources for the RDP supervision fund

The following data is used to allocate the research degree programme (RDP) supervision fund:

Indicator	Source of data for 2008-09	Source of data for 2009-10	Source of data for 2010-11	Source of data for 2011-12
Fundable home fee-paying research students	2007 Research Activity Survey	2008 Research Activity Survey	2009 Research Activity Survey	2010 Research Activity Survey

Data sources for the charity support fund

The following data is used to allocate the QR Charity support element:

Indicator	Source of data for 2008-09	Source of data for 2009-10	Source of data for 2010-11	Source of data for 2011-12
Project and capital income from eligible UK and overseas charities	2006-07 income from the 2007 Research Activity Survey	2007-08 income from the 2008 Research Activity Survey	2007-08 and 2008-09 income from the 2008 and 2009 Research Activity Surveys, respectively	2008-09 and 2009-10 income from the 2009 and 2010 Research Activity Surveys, respectively

Data sources for the business research element

The following measure is used to allocate funds for the QR Business research element:

Indicator	Source of data for 2008-09	Source of data for 2009-10	Source of data for 2010-11	Source of data for 2011-12
Research income from UK industry, commerce and public corporations	Average of 2004-05 and 2005-06 income taken from HESA Finance Statistics Return Table 4 for academic departments	Average of 2005-06 and 2006-07 income taken from HESA Finance Statistics Return Table 4 for academic departments	Average of 2006-07 and 2007-08 income taken from HESA Finance Statistics Return Table 4 for academic departments	
Research income from UK, EU and non-EU industry, commerce and public corporations				Average of 2007-08 and 2008-09 income taken from HESA Finance Statistics Return Table 4 / 5b for academic departments and academic services
